CANTON'S POLICE CHIEF GIVEN THE AIR

MAYOR CLAIMS HE BUNGLED UP MELLETT MURDER CASE

By Not Pressing the Inquiry in Its Early Days—One of the Foulest Murders Still Goes Unavenged—Bickering Hired Lawyer From Chicago and Prosecuting Attorney Are At Odds—Claim Is Made That Police Are Linked With Underworld.

Chief of Police S. A. Lengel was dismissed Monday by Mayor S. M. Swarts, of Canton. Lengel was to have returned to duty Tuesday after a 30 day suspension imposed July 24 when the mayor considered that the police inquiry into the murder of Don R. Mellett, Canton publisher, had failed.

Lengel has the right to appeal to the civil service commission, which was reconstructed Monday by the appointment by the mayor of two new members to succeed Price Janson and John Burris, dismissed earlier in the day.

Among the charges made against Lengel is one alleging that he "bungled" the investigation into the Mellett murder by not pressing the inquiry in its early days.

Other charges against the chief are that he tolerated vice conditions and open bootlegging and that he had too intimate a contact with the underworld and its characters and permitted the members of his department to have such contacts. Too close relationship with the underworld was charged also in the suspension ordered a month ago.

The chief left his home shortly after the service of the order and could not be reached for questioning regarding the plans. Earlier in the day, however, he said that he expected charges would be filed against him and that he was prepared to fight them. "They have never proven anything on me," he said, "and they never will."

It is understood that the chief will fight the allegation that he permitted the murder inquiry to be "bungled" by attempting to show that Mellett's family interfered with the investigation immediately following the shooting.

Mellett had made frequent attacks in his newspaper on the police department and editorially had backed an attempt several months ago to have Lengel removed. At that time Lengel appealed to the civil service commission and was reinstated by a two-to-one vote. Janson and Burris favoring his retention. James Allardice, the one commissioner of that date who still holds his position, voted to oust him.

Janson and Burris were removed Monday when the mayor found them guilty of neglect of duty. The two accused commissioners did not appear before the mayor, claiming the hearing was a "farce" and their dismissal "a foregone conclusion."

George Melborne and Charles Flory were appointed by the mayor to replace Janson and Burris.

Until a new chief is appointed Earl W. Hexamer, acting chief and safety director, will continue to serve as head of the police department. Reconstruction of the department is expected as a result of the dismissal of Lengel.

Tactics of Prosecutor C. B. McClintock in handling the investigation were assailed Monday by Joseph R. Roach, Chicago criminal lawyer, in a formal statement.

In a long recital of McClintock's alleged acts and failures to act, Roach indicated that the prosecutor, who under normal circumstances would carry the case to the Stark county grand jury Wednesday, by his actions has delayed the prosecution and has been a block to the federal inquiry into an alleged liquor conspiracy out of which

the murder plot is presumed to have arisen.

Roach has insisted that McClintock is not competent to present the case to the grand jury and has indicated that he will not offer his evidence to the grand jury if it is handled by the prosecutor.

McClintock has fought various attempts to have a special or assistant prosecutor appointed, but on one occasion he said he would look favorably upon the appointment of James A. White, former superintendent of the Ohio Anti-Saloon League. White has not been appointed.

Expected arrests Monday on federal warrants as a result of the inquiries into the liquor and murder conspiracies were delayed, Assistant District Attorney Howell Leuck said, because of the prospects of new evidence.

One of the allegations made by Roach against McClintock is that the prosecutor's view that the apprehension of Patrick Eugene McDermott, "key man" in the murder solution, is absolutely essential to the prosecution of the case, "has had one tendency, and that is to make possible the escape both immediately and ultimately of the criminals engaged in this transaction."

"Suspending of all efforts until the apprehension of McDermott," Roach said in his statement, "has hindered or would tend to obscure the facts attending this killing and to make cold the trail leading therefrom, and would constitute the strongest motive for the slaying of McDermott so that he would not be available as the 'key man' of the killing."

Roach also censured McClintock for his alleged statement that the arrest of Louis Mazer on a murder charge was a "blunder."

He also accused McClintock of blocking the federal inquiry by calling two intended federal witnesses before the Stark county grand jury and thus "tipping them off" to the fact that they had become involved.

Roach said he had evidence that McClintock declared he called the witnesses at the behest of District Attorney A. E. Bernsteen, while Bernsteen, according to a telegram in the evidence, denies telling McClintock about the two potential witnesses.

DR. C. A. HAYSMER

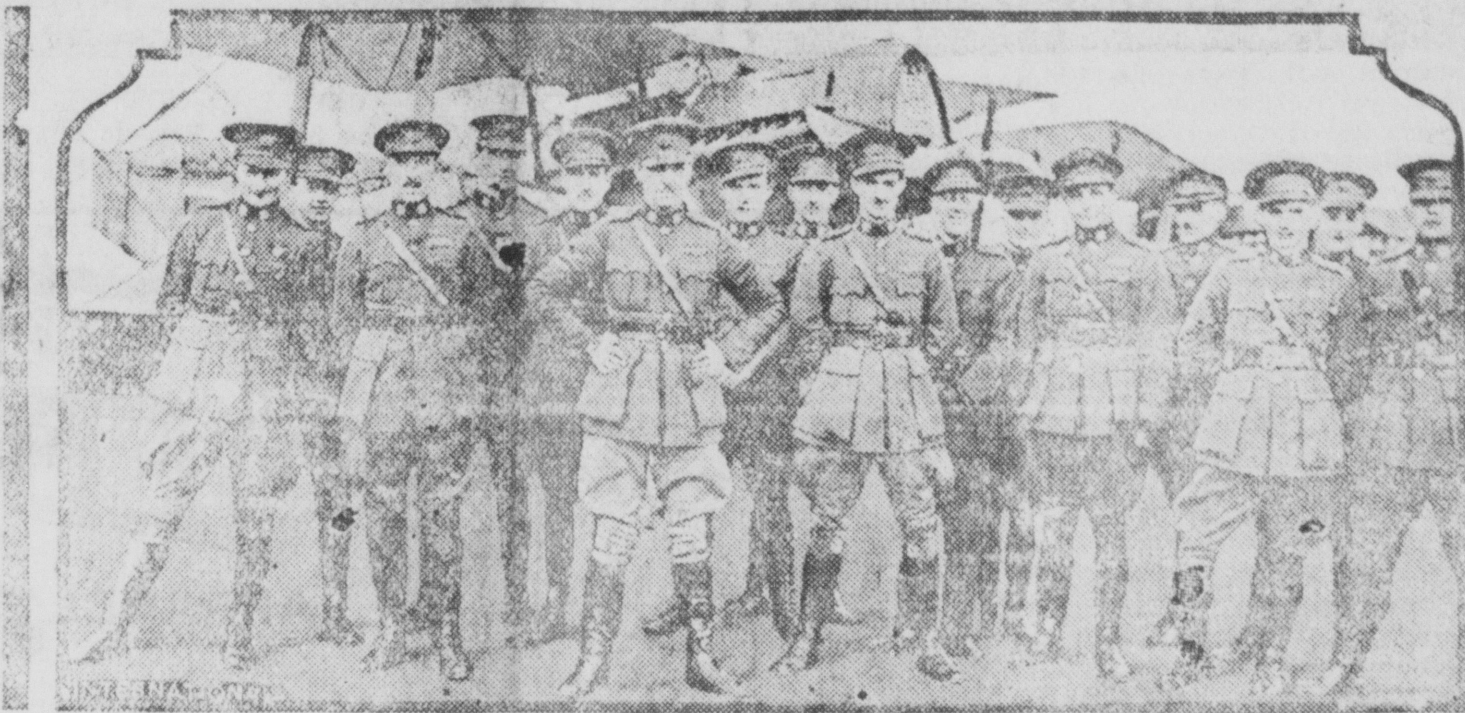

Dr. C. A. Haysmer of St. Paul, Minn., the Seventh-Day Adventist missionary in Korea, who was dismissed by the Far Eastern organization of the denomination on charges that he had branded the cheeks of a Korean boy with acid because the youth stole apples.

NAIL IN FOOT.

Carl Valentine, of Stoutsville, employed at the Sears & Nichols cannery, met with an accident Tuesday morning. He stepped on an upturned nail in a board and it passed thru his left foot. Mr. Valentine was taken to the office of Dr. Heffner, where he received treatment.

Free State Has Flying Corps

Some of the aviators who comprise the Irish Free State flying force. In front, with hands on hips, is Lieutenant Coogan, who, with Lieutenant Griffin, standing at his left, will attempt a flight to America.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

Batavia — Scott Workman today plead not guilty to a charge of first degree murder in connection with the shooting to death of his wife on August 13. Judge Charles White has set no date for Workman's trial. He had previously admitted the killing.

Columbus — Overthrow of the control of the Goodyear Tire and Rubber Co., of Akron, was sought in a suit on file in supreme court here today.

The suit, brought by G. Walter Booth, who is prosecutor of Summit county, in the name of a stockholder asked that eight members of the board of directors of the company be removed and that "control be taken away from Wall street."

Bellaire — Charges of drunkenness, neglect of duty and disorderly conduct faced Chief of Police Clarence Corbett. The charges were preferred by Mayor Floyd Conwell, who said he would suspend the chief unless Corbett resigned.

Sabina — The annual conference of the Methodist Protestant church was closed today following the assignment of ministers.

Columbus — Emanuel Ross, 17 year old negro boy is scheduled to be executed at the state prison here Friday. He was convicted in January of murdering Isadore Steeck while attempting to rob his store.

Columbus — David P. Wise, a prisoner at the state penitentiary is defendant in a suit for \$10,989 filed in common pleas court by the U. S. Fidelity & Guarantee company which charges Wise embezzled the amount from the Fidelity Savings & Loan company of Cleveland.

WARNER FAMILY REUNION.

The descendants of the Andrew Warner family, held a family reunion at the home of Mr. and Mrs. Chauncey J. McCord near Ashville last Sunday. Fifty representatives of the family were in attendance. Those from this city were Mr. and Mrs. Noah A. Warner, Mr. and Mrs. W. H. Warner and family; Mrs. Harry Radcliffe and twin children, Richard and Susanne, and Washington D. C.

UNDERWENT OPERATION.

Miss Alice Nutter, of Amanda, formerly of this city, underwent an operation at Grant hospital, Columbus. Her brother, Lafayette Nutter, of Chillicothe, was present when the operation was performed.

LARGE CLASS IS INITIATED BY AUXILIARY

The Womans Auxiliary, Howard Hall Post, department of Ohio, held an initiation preceded by a two course supper Monday evening at the Post room in the Memorial hall.

Twenty candidates were initiated. The ritualistic services were conducted by the officers; Mrs. A. A. Parrett president; Mrs. Charles Smith, first vice president; Mrs. J. J. Rooney, second vice president; Mrs. A. C. Wilson past president; Mrs. Charles S. Gusman, chaplain; Mrs. Herschel Alkire, sergeant-at-arms.

Mrs. Virginia Thacher, past president of the Franklin Post of Columbus, and wife of Colonel E. Strode Thacher, now visiting her parents, Mr. and Mrs. Grant Swearingen, in Jackson township, gave an interesting address, telling of the work of the Cambridge unit. She said that they had become so interested in the work of the auxiliary that they rented an old-fashioned country home and succeeded in furnishing it by donations secured from the citizens.

She told the initiates that the only way to make an auxiliary successful is to cooperate with the officers and help them in every way, every day in the work of the unit and post.

THE POMONA GRANGE HAD GOOD MEETING

Superintendent J. W. Fitcher Pointed Out Some of High Spots in Work.

Unusual interest was displayed by the members of the Pickaway Pomona grange at its meeting at the Washington township school building last Saturday. About 225 were in attendance at the afternoon session, during which there was a very lively and interesting discussion on grange activities. Five candidates received the obligation of the Fifth degree.

The lecture hour was taken up with music and readings, together with a most interesting and imposing address on some of the high spots in grange work by Joseph W. Fitcher, superintendent of the Butler county schools. Mr. Fitcher is a speaker of deep thought and forceful words.

In Training

Children at Meavy, Devon, are called to school by the beating of a drum. They complain that the exercise doesn't seem to tire the teacher's arm. —Passing Show (London).

BIG FIELD DAY.

Cleveland — Field day for employees of the New York Central railroad employees will be held at Scott field, Toledo, September 18. Many are expected to attend, which promises to be one of the largest athletic exhibitions in the state this fall.

Governor Donahey will be in the reviewing stands, together with the mayor of Toledo and officials of the New York Central lines.

Competition in all track and field events will be held, besides baseball and other games. Moving pictures of the event will be taken.

VISITED CANTER'S CAVE.

Misses Blanche Steinhour, Circleville; Mary and Clara Hutchison, Juanita and Wanda Steinhour, Ashville; Catherine Remly, Lucile Steinhour, Chillicothe; Messrs Harold Johnston, Fox Postoffice and Karl Hutchison and Darrell Moore, Ashville, motored to Canters Cave Sunday. They spent the day picnicking, and viewing the caves. A good time was reported by all.

SENATOR G. H. MOSES

The latest photographic portrait of United States Senator George H. Moses of New Hampshire.

RADIO FANS WILL TUNE IN ON PROGRAM

Wednesday's five best radio features:

MAN KILLED IN FALL ON THIRD RAIL

Tourist on His Way From Home in West Virginia Was Electrocuted.

His hands coming in contact with the third rail on the Scioto Valley Traction line, Henry Foose, 23, of near St. Albans, West Virginia, was killed instantly Monday morning near Hopetown.

Foose was climbing up the bank from the creek, where he and his cousin, Robert Foose, had been washing their hands, when he slipped and fell, both hands coming in contact with the deadly rail. He was knocked back and died instantly, according to his cousin.

The two young men were on a vacation tour thru southern Ohio. The body is now at Ware's but no word has been received about the disposal of the body. The father's name is Samuel Foose. —Scioto Gazette.

THE CHAMPION CORN GROWER GETS TROPHY

Cup Will be Presented by Governor Donahey at the State Fair Thursday.

Kenton—Ira C. Marshall, Hardin county farmer and corn growing champion of the world will be officially honored by the State of Ohio during the Ohio State fair, August 30 to September 4, when Governor Vic Donahey will present him with a silver trophy cup.

The presentation ceremonies on behalf of the state, will be a feature of Governor's day, Thursday.

Later it is planned to have President Coolidge present the corn king with a trophy.

Recently Marshall startled the world by growing 1601 bushels of corn on a ten acre plot on his tenant farm, smashing all existing corn growing records. This season Marshall is endeavoring to better his own mark and the present condition of his crop is very favorable.

COMMANDER OF OHIO KNIGHTS PASSED AWAY

Charles H. Voegele, grand commander of Ohio Knight-Templars, died at his home in Mansfield Monday night. He had been in failing health for some time, but was stricken suddenly Saturday afternoon.

Besides being grand commander, he was a member of the board of directors of the Ohio Masonic Home and was a Thirty-Third degree Mason.

The funeral services will be held Wednesday afternoon under the auspices of the grand commandery of Ohio, Knights-Templar.

Mr. Voegele was well known in this city and with his wife attended the Knight-Templar picnic in the Zwicker grove, June 9.

New Fort Sumter

Fort Sumter has been rebuilt since the Civil war. The fort still retains its name. The reconstruction was begun in 1870, suspended in 1876 temporarily, and completed about 1890.

JURY RATES SNAKE BITE AT \$40,000

Railroad Worker Gets Large Verdict in Suit Brought in Nebraska Court.

Lincoln, Neb.—Forty thousand dollars for a snake bite is the amount that a jury here has ordered the Northwestern Railroad company to pay to Herbert B. Brannan, a former roundhouse employee at Chadron. The verdict is based on the claim of Brannan that his present condition, that of a physical wreck, is due entirely to the fact that, while he was working under an engine one day, in a pit partly filled with water, a moccasin snake dropped from above into his glove, open at the wrist, and before he could get it out the reptile had bitten him several times. This was on July 23, 1924, and since then he has had to have seven operations performed on his right arm, which left him a cripple and disabled him for life.

Record Judgment.
The judgment is one of the largest ever obtained in the Nebraska courts against a railroad company. The man's right arm is bent at the elbow and cannot be straightened and it was the sight of this that caused the jury to give him \$40,000, although he had asked for \$65,000. One eye is partly paralyzed and he is much underweight. He said he was unable to dress or undress himself.

The case was fought hard for days, with one set of witnesses telling that the pits under the engines in the roundhouse were not kept clean, had water in them most of the time and were a favorite resort for snakes, frogs and lizards. Complaints to the foreman had brought a response that they ought to be too hard-boiled as railroad men to complain. It was stated, but the foreman says nobody ever complained to him about snakes being present until after Brannan claimed to have been bitten by one. Other witnesses had not had any trouble from snakes.

Experts Testify.
Zoologists from the state university testified as to the dangerous toxic effects from the bite of one kind of snakes and that bacteria from the teeth of others that were nonpoisonous produced infection. The railroad company said that when the Brannan lawyers first drew the petition they claimed he had been bitten by a pit viper, and later changed this statement when they learned a pit viper was so-called not because he inhabits pits but because of a depression in the head.

The railroad's contention was that Brannan had always been puny and that he had a chronic complaint which was of a progressive nature, and that the crippled arm and poor health were due to lymph stagnation. The company doubted that Brannan ever was bitten by a snake, and called doctors in who diagnosed it as a chronic condition, and railroad men to show the pits are not snake harbors. Brannan claimed the snake dropped from a rail flange into his gauntlet.

FOR SALE.
A dandy modern country home of 2 acres of good farm land, and plenty of fruit, located close to a good city on a good pike, will trade for a clear farm. For further information see or call,

Love's Entanglement

By CLARISSA MACKIE

(Copyright.)

"WHERE are you going, Lena?" asked Mr. Freer, from his comfortable chair in the library.

The girl flushed, then she lifted a firm little chin and told him, "Bob is coming tonight, and I am going across the garden to meet him. Do you object, father?"

"Yes, in a way—he is coming on a business trip, too—he is bringing out some bonds from the office—I had to rush off without them and he said he was coming out anyway tonight—and would bring them. I want him to bring the bonds first, before anything happens to them. After that—"

"I suppose there is danger—he will be alone," said Mrs. Freer, looking up.

"None at all—none at all," reassured her husband, and both women felt easier about Robert Blair, who was manager of Mr. Freer's office, and future husband of Mr. Freer's daughter.

That was at eight o'clock—an hour passed and Robert did not come.

"The nine-ten is in; I will ring up and inquire if anyone has seen him get off the train—there isn't another one until the midnight," said Mr. Freer, going to the telephone.

After a while he returned to his wife and daughter. "No," he said heavily, "No passengers came in on the nine-ten excepting Joe Lant."

"You must be sure that he started for Blye before you begin to worry about him," said practical Mrs. Freer.

"I am sure he started," said Lena. "You know, father, that if Bob says he will do a thing, he does it—it is business first with him, isn't it?"

"It always has been," observed Mr. Freer cautiously.

"How much were the bonds worth?" asked his wife.

"About sixty thousand dollars."

Tears came into Lena's brown eyes. "Oh, father, you speak as though there might be a suspicion that Robert had been tempted by the value of the bonds, and—"

"There, there, dear. I don't suspect Robert, only it's confounded queer that tonight of all nights he should have missed coming on time."

"I thought you were going to telephone around," prompted Mrs. Freer.

"I am—you know his home number, Lena?" Lena gave it, and also the name of the garage where Robert kept his car.

Lena listened in agonized suspense as her father telephoned. She firmly believed that something had happened to her lover.

"Left the house at seven-thirty?" repeated Mr. Freer over the telephone.

"And told you he was coming down here for the evening? Yes—I see—then the car was waiting at the door and he got right into it and drove down here? Thank you, Mrs. Smith; he has probably had a blowout or something." He hung up and faced them, for the first time exhibiting real concern.

"Robert left his boarding house at seven-thirty in his car—told Mrs. Smith that he was coming to Blye, and to ring him up here if any one called to see him. Somewhere between town and Blye—"

Lena had run out of the room, and they heard the screen door slam, as she went out.

"Poor child, she is frightened about him. Horace, you don't think for a moment that Robert would—"

"Of course not—something has happened to him—he's either had an accident or been held up."

"If it had been an accident some one would have telephoned by this time."

"That's so. I'll get the car out and run back along the road. I'll take Lena with me."

When the car was ready Lena could not be found.

"She must be out in the grounds somewhere."

The Freer place was the old homestead that had belonged to Mr. Freer's family for generations. The grounds were extensive and occupied several acres in what was now a suburban town. There were two entrances—the front one, and then the garden entrance on the side street. The garden gate led through the beautiful modern gardens, and also the old-fashioned garden that had survived for 50 years. The garden gate was always locked, but Robert had a key. When Lena went out she fled to the scene of so many happy hours, the rose garden. Here Robert had proposed to her, and here they often met for a few minutes together when he came down to Blye.

"Something has happened—I can hear some one calling," exclaimed Mr. Freer. "Listen."

"It is from the rose garden—two voices, a man's and another voice. It sounded like Lena's call—perhaps she has found him."

The Freers went running. Lena came to meet them.

"Father—mother—he is here—I am going to get James and Martin to help."

The Freers stared at the sight before them. The famous rose garden was plainly visible and caught in the very midst of the well-known maze of rose bushes was Robert Blair, hatless, dishevelled.

"I had a bad cold and couldn't call very loud," he whispered when at last the men had slashed a path to the heart of the maze and had freed him.

"I will have the whole thing dug up and replanted," said Mr. Freer.

"Here are the papers," said Robert.

CHEER FOR CAR OWNER

Thirty gallons of superior oil from a ton of shale at a cost of less than \$1.25 a ton to handle the rock is said to be an accomplishment of an oil-shale company just starting operations in the West. We doubt if production on a large commercial scale would be found quite as simple and inexpensive as that. Nevertheless, oil from shale is coming along rapidly, and the supply of rock is less likely to be exhausted than the present reservoirs of the fluid.

The beauty of this development is that the supply in the United States is sufficient for all needs. At one point in Wyoming it is estimated that the amount of rock is sufficient to keep 500

plants like the existing one going for 1,000 years, and even greater deposits exist in California.

We wish we could record that the outlook for American potash is equally promising.—Boston Transcript.

Resembles Mirage

The bureau of standards says that the phenomenon of pools of water seen on the road ahead, only to disappear upon approach, and appear farther on is the same as the mirage seen over hot, sandy plains. The air next to the roadbed becomes hotter than that above and the lower layer consequently reflects just as a body of water does.

MILK is the best food for growing children. It contains all the food material needed for the proper development of their bodies. No other food can be used in its place, because no other food supplies equal nourishment and building material for muscle, bones and teeth. Children who may be under-weight, anaemic or otherwise delicately constituted, begin to thrive as soon as given a liberal allowance of pure rich milk.

If you would see your children grow sturdy and smiling, with sparkling eyes, rosy, dimpled cheeks, firm flesh and a sound, untroubled stomach—use scientifically pasteurized milk.

OUR PASTEURIZED MILK Comes from selected farms

It is hygienically handled from the moment it reaches the light of day until it is delivered to you. It is scientifically pasteurized and bottled by the most sanitary method. The bottles are washed, scalded and sterilized with live steam before being filled.

It costs you no more to be safe than unsafe. Take no chances with milk for your children. Just phone your order to us and service will begin at once.

FATTENING STEERS

Stocker Ration Is Best Winter Feed For Steers To Be Fattened on Grass.

Stocker rations during the winter and early spring proved better than fattening rations as a preparation for steers to be turned on grass, in tests now closing at the Ohio Agricultural Experiment Station.

The four lots of white-faced steer calves in the experiment were turned on bluegrass pasture soon after Livestock Day at the Station, June 4. Each lot had received a different winter ration varying from a "stocker" or all-roughage ration of alfalfa hay and corn silage to a fattening ration of corn and oilmeal in addition to alfalfa hay and corn silage.

During the dry-lot feeding period, or up to Livestock Day, the rations containing the most corn or concentrates were the most profitable. The steers so fed were in much the best market condition and would then have brought the highest market price.

The four groups were kept and turned on bluegrass pasture to learn what gain and profit each would make when all alike were fed what corn they cared for and one pound of oilmeal daily per steer in addition to the pasture.

The steers that had received the stocker ration of alfalfa hay and silage during winter and spring gained 27.3 pounds per head in four weeks or nearly one pound a day on pasture. The steers that had received oilmeal in addition to alfalfa and silage gained 7.3 pounds per head, or about one-fourth pound a day.

Those that had received both corn and oilmeal in addition to alfalfa and silage failed to gain when turned on pasture and actually lost 1.4 pounds per head in the four-week pasturing period. They were too fat when turned on pasture and, even though receiving a full feed of corn and oilmeal in addition to pasture, lost weight. They would have done better if sold from the barn lot without a taste of grass.

"Good fattening rations for beef cattle in dry lot are rather uniformly the most profitable," says G. Bohstedt, head of the animal industry department at the Station. "However, cattle when nearly fat had best be kept in the dry lot until shipping. If it is one's intention to fatten cattle on grass after the roughage and silage give out in late spring, it is best not to feed too much corn previous to pasture feeding."

His Status

Man (to young clerk behind counter)—Are you the head of this business?
Clerk (who is the grocer's son)—No, I'm only the heir of the head.

THE WHOLE WORLD

Realizes today that all prosperity depends on the prosperity of the farmer—1925 was a better year than 1924 and 1926 will be still better. The farmer is represented by a majority of land owners and real dirt farmers in all legislative bodies—State or National. The great demand for food is increasing as the population grows. We can't exist without good, wholesome food and the farmer that produces what we eat must be properly compensated.

The sources of money supply are alive to the fact that money loaned on farm lands is safest. Rates on City property is usually 6½ per cent. We have unlimited money for the farmer at 5 per cent and 5½ per cent.—10 and 20 years. You to select the loan that suits your purpose best. We have farms for sale that will pay you to own. A farm is the best basis of credit.

"Nicky," Polar Mascot,
Survives Lost Master

New Philadelphia, Ohio.—With a record behind her that would discourage any conscientious mascot, Niccarowra, a cat, survivor of two tragic expeditions, is the house guest of David Maurer, father of Fred Maurer, who was lost in a dash to reach help, when his party, the second Wrangell island expedition, was stranded in the Arctic in 1923.

She was mascot on the ill-fated Karluk, which was wrecked in an ice pack in Camden bay in 1913. She was rescued from the Karluk by a sailor, and taken by Maurer on the flight across the dreary snowfields to Wrangell island in a fur bag on his dog sled.

Nine years later at the time of the second Wrangell island expedition, after Maurer was given up for dead, Nicky was brought back to her master's home here.

SOCIAL CALENDAR

Miss Ann Bennett is entertaining Miss Virginia Woodard, of Wooster, and will give a dinner in her honor this evening.

Miss Alice Phillips will entertain a party of young people at the home of her aunt, Mrs. John G. Boggs, Wednesday evening.

Mrs. Alice Ridgway entertained to dinner Sunday her sister, Mrs. B. R. Welsh and granddaughter, Verda Belle and two daughters, Margaret Jane and Ruth, Mr. and Mrs. William Parady and daughters, Doloris and Betty Jane, Mr. and Mrs. William Stretzer of Columbus. The evening callers were Mr. and Mrs. James Hoover and son, Glenn, of Ashville; Mr. and Mrs. Charles Wilson and son, Eugene, of South Bloomfield; Mr. Bunn Welsh and son, Carl, and Mr. B. R. Welsh, of South Bloomfield.

The annual List and Kern reunion was held at the beautiful country of Mr. and Mrs. John A. List of Pheasant, on August 22. All came with well filled baskets and the tables fairly groaned with their loads of good things to eat. All did justice to it and at 4 o'clock ice cream, cake and lemonade was served. One hundred and eight were present. Those from a distance were Mr. and Mrs. Charles E. Kline and family, of Terre Haute, Indiana; Mr. and Mrs. N. D. Kern and family, of New Albany; Mr. and Mrs. Fred Betsch and family, of Chillicothe; Mr. and Mrs. George Fry and family, Mr. John Fry of Cook Station, Mr. and Mrs. Frank Clarridge and son, Mr. and Mrs. Irwin Neff and Mrs. Lote Timmons and son, Miss Alice Dildwine and Mr. and Mrs. Richard McCormick and Mrs. Lynn Heffner of Columbus, Ohio.

Wyoming Pioneer State
in 'Petticoat Government'

Cheyenne, Wyo.—"Petticoat government" has had a long way in Wyoming. From the time Wyoming, then a territory, in 1890 blazed the way for woman's suffrage by enacting an equal suffrage law, which later was enacted into a state statute, women have played many varied roles in its government.

The appointment of Mrs. Esther Morris in 1890 by the territorial government as the first woman justice of the peace in the United States culminated in 1924 with the election of Mrs. Nellie Tayloe Ross, the first woman governor.

Other milestones in woman's progress in public life have been marked in Wyoming by the selection of the first jury on which women served at Laramie, Wyo., in 1870; the election of Mrs. Estelle Reed Meyer in 1894 as state superintendent of public instruction, who is now the general superintendent of Indian schools, and the operation of the entire municipal governments by women of Jackson in 1920 and Cokesville in 1922.

Dollar Day Thursday, August 26.
FRIEDMAN'SLIKE RISKING YOUR LIFE TO
SAVE YOUR HAT!

Operating your automobile without public liability and property damage insurance is like risking your life to save your hat.

The greatest possible savings that you can make by neglecting to insure is the few dollars that a policy cost you.

Compare this with the big damage judgments that are being given today. The ten, twenty-five or even thirty-five thousand dollars that you might be forced to pay to an injured claimant, if you had an accident and no insurance!

It is worth while? To risk thousands, tens of thousands, possibly everything you own just to save the few cents a day that an automobile policy would cost you?

S. G. RADER.

MONEY TO LOAN

5 year, 5 per cent loans on farms;
abstracts made.Joseph W. Adkins,
14julyd&wtf. Probate Court.ALABAMA INDIANS
IN LAST OUTPOSTRemnants of Ancient Tribe
Wasting Away in Texas
Piney Woods.

Dallas, Tex.—Deep in the piney woods of east Texas lives a people who have come down from the dim antiquity of early America. They are the Alabama Indians, an isolated, orphan tribe.

Strange to the ways of modern life and virtually without the protection of the great white father at Washington, they are rapidly going the way of the vanishing race. Through a century, poverty and struggle have been their lot, but ever a gentle people, they have uttered no complaint.

Congress Reminded of Tribe. Their condition has been brought to the attention of congress by Representative Bridges of Texas, who asked \$125,000 to provide them with land, live stock and equipment.

In the heart of the woods they live a strange and detached life. When De Soto sought the city of gold in America's wilds, the Alabamas even then were an ancient nation. Two of De Soto's chronicles mention them.

In the early part of the Eighteenth century, the French found these Indians in what is now Alabama and became their fast friends. The Indians, driven by approaching civilization and a desire for more hunting ground, appeared in Texas early in the Nineteenth century. They built fenced in village, and there one of their greatest white friends, Gen. Sam Houston, found them in 1834. Through his influence the Texas legislature gave them two sections of land which they occupy to this day.

They live in what is called "The Village" in the southwestern corner of Polk county. Selected for hunting purposes, the land is not adapted to agriculture, and since the game is almost gone, their livelihood is scant. General Houston advised them to remain in Texas, so when the government offered to remove them to a reservation they declined.

Children Speak English.

The tribe today numbers about 250. Inter-marriage and lack of medical knowledge have weakened them. They have few modern implements, and know little about scientific agriculture. Among themselves they speak only the musical Alabama tongue. It is against their policy for the women to speak English, but the children are learning the language rapidly.

They do not mingle with whites socially and are virtually unnoticed by civil authority. Divorces are unknown. They have only two punishments for crime, banishment and death, but these have not been used in a generation.

The tribe's principal link with civilization is a church and school conducted by missionaries supported by the Southern Presbyterian church.

The Indians adopted American clothes some years back. Their houses are log and frame, built by themselves. The village is really a collection of small houses in the woods, without streets. Birds, animals and trees are the community's chief interests.

Miniature Pile Driver
Tests Safety of Match

New York.—A match is a match to most everyone, but to the expert there is a wide difference between a safe and dangerous match.

At the underwriters' laboratories here, where tests are made of thousands of devices and materials to prevent fires, a miniature pile driver daily pounds away on matches.

The little weight falls on the side of the match head. If the match blazes it is reported unsafe. The requirement is that it must be lighted only by friction at the end of the head.

Another device tests the strength of the match stick, to make sure it is strong enough to stand ordinary rough usage. Else striking may break the stick and cause the burning head to fall. It also is determined whether the match will burn its complete length without breaking off and if breaking off the spark dies immediately.

Matches and mice often appear together in stories of fires. Engineers decided to make a test. Several mice were put in a cage and given nothing to eat but matches. The mice did not gnaw the matches and finally had to be released before they starved to death.

Chinese Pheasant Hen
and Chicks Stop Traffic

Portland, Ore.—A Chinese pheasant hen, in to see the sights of the city, with her brood numbering no fewer than 13 fluffy chicks, recently held up traffic on a busy street intersection. There was no officer on the corner but the hen decided to cross anyway.

Some youth, who prefers to remain anonymous, sized up the situation and stationing himself in the center halted the traffic. Busy drivers entered into the spirit of the situation, left their machines and aided in rounding up the clucking hen and her 13 babies. The brood was turned over to the Oregon Humane society.

Tree Gives Milk

New Haven, Conn.—A "cow-tree" that gives milk was discovered by Prof. Samuel J. Record of the Yale school of forestry on his recent trip to British Honduras and Guatemala.

EXPLORE GREAT
FALLS FROM AIRCataract in Inaccessible
Northeastern Quebec Said
to Rival Niagara.

Toronto, Ont.—For almost a hundred years the existence in northeastern Quebec, near Labrador, of a waterfall and cataract rivaling Niagara has been known. But so inaccessible is the location, lying as it does some 400 miles northeast of Lake St. John, that only the most intrepid adventurers have ever set eyes on it.

This summer the Quebec government is sending out an expedition of 50 men, in three airplanes, to explore the locality and report on the commercial possibilities of the waterfall as a power development.

On Hamilton River.

The falls are situated on Hamilton river, which finds its outlet in the Atlantic through Labrador. The river is about as large as the Ottawa, so that the flow of water is less than at Niagara, but there is a perpendicular drop of about 200 feet, compared with Niagara's 160, and including a series of smaller falls and rapids above and below, extending over a distance of 12 miles. The total fall of the Hamilton river is 760 feet. The canyon below the falls is said to be unique.

The falls and canyon are sometimes described as McLean's falls and McLean canyon, after John McLean, a Hudson's Bay company employee who visited them in 1829 and afterward lived in Elora, Ont. According to the geographic board of Canada the correct name of the falls is Hamilton, after the river, though they sometimes go by the name of Grand falls, Patscheschewan falls, Pitshetonau falls or Mistapowistock falls.

The Hamilton river is about 700 miles long and has a drainage area of 29,100 square miles.

Described as Phenomenal.

Describing the falls Dr. A. P. Low of the department of mines of the Canadian government, says: "Such a fall (760 feet) would not be extraordinary for a small stream in a mountainous country, but is phenomenal in a great river like the Hamilton. The basin into which it precipitates itself at this point is nearly circular and about 200 yards in diameter. It is surrounded on all sides by nearly perpendicular rocky walls, 500 feet high, except at the narrow cut at the head of the falls and where the river issues from the basin. The noise of the fall has a stunning effect, and although deadened because of its inclosed situation can be heard for more than ten miles away as a deep, booming sound. The cloud of mist is also visible from any eminence within a radius of 20 miles."

It is estimated that there is 300,000 electric horse power in the falls.

Nit-Wit Culex

What shakes our confidence more than anything else in the theory that our dumb animals reason is the way a mosquito will light on our ankle sometimes, with six earnest business girls right there on the next porch.—Ohio State Journal.

In 1930

"Hubby, I may be a little late for dinner. I'm taking a taxiplane to Paris to do a little shopping."
"May be a little late myself. Been invited to try some new golf links in California."

Embarrassed

My father was a preacher. One Sunday, just as he was getting to the climax of his sermon, he reached into his pocket and, horrors, pulled out a plug of tobacco in his absent-mindedness.

As if that were not bad enough, he raised it, also absent-mindedly, and was about to take a chew when he realized what he was doing.

Then he tried to slip it back into his pocket, but, of course, all eyes were on him and everybody saw what he had done. That was my most embarrassing moment.—J. A., in Capper's Weekly.

OPENING OF TEA ROOM.

Thursday night will mark the opening of the Earl Tea Room under the new management. Ice cream and candy will be given away and Blenn Bales' orchestra will furnish music. Everybody invited.

SALVATION ARMY FUND COMMITTEE.

The personnel of the committee which will sponsor the campaign for raising funds for the Salvation Army drive which starts on Wednesday under the direction of A. L. Durkee, field representative of the army, are the following citizens of this county: Mayor Geo. M. Fitzpatrick, Judge Joseph W. Adkins, O. S. Howard, Rev. A. H. Beardsley, Mrs. Mary Boggs, Mrs. Mary G. Morris, John A. Ryan, J. R. Noecker, H. E. Betz, Rev. S. W. Hiles, E. S. Neuding, Rev. E. A. Tovey, M. E. Friedman, H. B. Colwell, Rev. L. O. Ferguson.

Fighting Tree Pests

There is an easy way to get rid of curculios, which are the pests that spoil plums on the trees. These pests are almost dormant early in the morning, and if the trees are jarred sharply most of them will come tumbling to the ground. The jarring is done readily enough without damage to the trees by using a stout pole, one end of which is wrapped with burlap or old blankets.

Ancient Dentistry

It is known that the Romans used false teeth and possibly bridge work. The filling of teeth is of later date, a dental bibliography written in 1532 fixing the date of the introduction of this branch of the profession as about 900 A. D.

"WID" GUNNING ONE OF MOVIES BEST WRITERS

Former Chillicothean Promoted to Editorial Advisor of First National.

"Wid" Gunning has been appointed editorial advisor of motion picture production for the First National Pictures Corporation.

Concerning the appointment, the film company has the following to say: "Another indication that the motion picture industry is reaching out for the best brains in the market is contained in the announcement just made by John McCormick, western production manager of First National Pictures Corporation, of the appointment of "Wid" Gunning as editorial advisor for certain producing units of that concern.

"In 1914 he founded and conducted a column of comment on screen activities in the New York Daily Mail—the first regular newspaper feature to be devoted to the new industry. With this signal recognition of cinematographic enterprise as a new element of news, barriers fell and the six or eight line paragraph anent films used only as a "filler" at the bottom of a column of information about the 'legitimate' stage crew in stature 'until it forced the theater into almost as secondary as space allotment on the amusement page."

Mr. Gunning married Miss Helen Fickardt, daughter of Mr. and Mrs. F. L. Fickardt, of this city, and they live in Hollywood, California.

PERSONALS

Dr. and Mrs. W. H. Wilderson spent the day in Columbus.

Mrs. Harvey Dresbach spent the day in Columbus.

Misses Marion and Helen Reid spent the day in Columbus.

Frank Fuller attended the Republican State convention in Columbus today.

George Bolender, of Wayne township, was a business visitor in Columbus today.

Mr. and Mrs. Marion Claiser and daughter, Miss Rose of Clarksburg, spent the day in Columbus.

M. E. Noggle and Walter Marion were business visitors in Columbus today.

Mrs. J. H. Harsha, of Chicago, Illinois is the guest of her sister, Mrs. Byron Frederick, of Wayne township.

Raymond Maechtel, of New York City, is the guest of his sister, Mrs. William Good, and family, of North Pickaway street.

Mr. and Mrs. Charles Dresbach and grandson, Harold Dresbach, are visiting in Kenton guests of Mr. and Mrs. V. T. Reber.

Mrs. E. S. Thacher and daughter, Miss Virginia, leave the latter part of the week for Camp Knox, Tennessee to join her husband and son, for a week's outing.

Miss Clara Belle Steele is entertaining a classmate of Otterbein college, Miss Thelma Gustin of Toledo, and Miss Esther Moore, of Canal Winchester, this week at her home on North Court street.

Mrs. Germain Joseph and daughters, Misses Fannie and Helen, and son, Samuel and Durward Dowden, who have been on a motor trip to the Sesqui-Centennial, Baltimore, Washington Atlantic City and New York City, the past ten days returned home Monday evening.

Mr. and Mrs. R. Aronson and son, Norman, who have been on a tour of the east for the past five weeks have returned home. They visited relatives and friends in Cleveland, Ohio, Buffalo New York, Fall River, Springfield and Boston, Massachusetts. Their son, Harold Aronson, in New York City, and on their return visited the Sesqui-Centennial at Philadelphia.

Dumdum Prohibited

The dumdum bullet is a soft-nosed or expanding bullet, so named after Dumdum arsenal, the place near Calcutta, India, where it was first made. Its use was prohibited in warfare by The Hague conference.

Thief's Love Romance

GREAT SESQUI STADIUM OPENED AT PHILADELPHIA

Photo by AERO Service Corporation.

The giant arena in the centre of the Sesqui-Centennial International Exposition site in Philadelphia was built in approximately 300 working days. It was completed and in use a month before the opening of the big exposition which celebrates the 150th anniversary of the signing of the Declaration of Independence. This photograph, made from the air, shows nearly 3,000 boys on the playing field, massed there for the dedicatory exercises on May 1 which formally opened the structure. In the stands are seated 10,000 persons watching the program. A group of 10,000 persons is a large crowd but they are only a "drop in the bucket" in the big Philadelphia stadium. The boys paraded onto the field to the accompaniment of fourteen bands and there went through their drills and athletic exercises for the benefit of city officials and parents.

"NEWS and PROGRESS" No. 4

ECONOMIC SIGNIFICANCE AND SERVICE OF THE AMERICAN NEWSPAPER AND NEWSPAPER ADVERTISING—From latest volume in *Manhattan Library of Popular Economics*, republished in serial form through courtesy of Bank of the Manhattan Company, New York.

THE MODERN MARKET PLACE

WHEN a carrier leaves a paper on a doorstep, it may not occur to him that he is playing a part in the economic life of his town, but so it is, for to each individual subscriber he is really delivering the market place of the community. How many carriers, how many readers even, would recognize their familiar newspaper under such a title? Yet such it literally is.

Perhaps few people have stopped to think how completely the newspaper has become the market place of the community, bringing to all a knowledge of available goods and services. In fair and stormy weather this market place comes to the buyer in the form of news—news of what to buy and why, where to buy and when, and how much to pay.

Follow a newspaper into any home. Here are gathered the members of the family circle—father, mother and children. Within a few hours each will read it and for each there must be that which he is most interested in reading.

Every editor knows this; every successful editor makes provision for it. To address each little audience with its special tastes he sets forth an extensive bill of fare. In it are political and financial news, foreign cables, a woman's page, news of sports, society items, literary and amusement reviews, science, comedy and what-not besides.

To this wealth of information each member of the family will respond and each in his peculiar way. Only to one part of the newspaper will there be any degree of common response because that part has a universal appeal. Yet curiously enough it is the one part which was not directed by the editor, prepared by any of the staff, and which is not his own. It is the part which is the most important of the newspaper, the part which is the most valuable, the part which is the most interesting, the part which is the most useful, the part which is the most necessary, the part which is the most indispensable, the part which is the most essential, the part which is the most fundamental, the part which is the most primary, the part which is the most basic, the part which is the most central, the part which is the most important, the part which is the most valuable, the part which is the most interesting, the part which is the most useful, the part which GETTING OUT THE VOTE

The American Legion is to begin next month a nation-wide campaign to get out the vote in November. The Legion doesn't care how the vote goes, and it is not concentrating upon candidates or issues. Its object is to increase the number of people who take the least part, a conscientious citizen can take in the conduct of government. As matters now stand, this is a popular government by a small minority of the qualified voters. Only half the voters go to the polls, and in many cases the choice is determined by one-third of them.

A number of national organizations are interested in getting out that portion of the vote which favors particular legislation. There have been several laudable campaigns to increase the whole vote. But this is the first time that a strong national organization has tried, through the agency of its numerous local branches, to persuade people to go to the polls and register whatever opinions they may have reached. There is in the movement a challenge to the qualified but indifferent voter. He has become the concern of the country's strongest patriotic association.

If the Legion posts set the interesting field. This unknown vote holds in its power the destinies of the country, if it can be roused to action. It could at one election overcome the political boss vote, which is herded to the polls to vote as ordered, and bring about a radical reform in every community where the government has fallen into the hands of corrupt men and women.

If the Legion posts set the example and exert the great influence which they wield in many communities, the veterans may advance the welfare of the country fully as much as they did eight years ago on the battlefields of Europe. They deserve and should have the support of the people everywhere.—The Indianapolis News of August 16, 1926.

Shuttleless Loom Is Invented by German

London.—A shuttleless loom hitherto regarded as an impossibility, has been invented by a German named Gobler, according to a report from Berlin and has been already thoroughly tested and proved feasible in German factories before being publicly announced. The mechanism is described as the simplest and works on two rods which carry threads and weaves all kinds of cotton yarn and jute with the same apparatus.

The claim is made that production is quicker and safer, that the number of operatives is reduced, that the complicated preliminary steps before winding the threads will be obviated and the cost of the loom construction greatly lessened.

Lancashire has not yet heard of the new invention and is not likely to adopt it unless its weaving skill, handed down through generations, is equally applicable to the new machine as with the old well-tried Arkwright loom.

Loses Leg to Save Dog

Middletown, N. Y.—To avoid killing a dog which stood on the tracks of the New York, Ontario & Western railroad, Jacob Hauser applied the brakes on a gasoline track car, causing it to overturn, inflicting injury which necessitated the amputation of one of his legs.

SILVER LINING

There had been a blowout, and the father of the family was perspiring and profanely changing tires.

"I don't see why you have to talk that way," said his wife reproachfully. "You act as if it were a total loss. You never see the good in things."

"Well, what good is there in this?" "Why, it tickled the baby so. He laughed right out loud when it went bang."

Last Hopes

First Man—Ah, it's a wonderful experience I have on a holiday, when I go out into the great forest and walk among those splendid trees and commune with nature, absolutely alone, with no one to bore me!

Second Man—It must be great. Next time I'll go with you.—Pathfinder.

Improving Cream and Milk Supply

Scoring Contests Serve to Create Interest in Better Quality.

(Prepared by the United States Department of Agriculture.)

Cities, villages, and even whole counties are improving their milk and cream supply through scoring contests, says the United States Department of Agriculture. While the contests are of various kinds, all of which serve to create an interest in better quality milk, two general classes are emphasized by the department as worthy of consideration. These are the contests in which samples of milk and cream are submitted voluntarily and surprise contests in which the samples are collected from the distributor or producer without warning. The bureau of dairymen has drawn up plans for use in such contests which should be of interest to any community contemplating a milk-improvement program.

Samples Specially Prepared.

Where the samples are specially prepared by the exhibitor and submitted voluntarily for scoring, the results may or may not indicate the quality of the product regularly sold. And yet, says the department, when contests are first held in a community or large territory, they do have considerable educational value because they show that milk of high quality can be produced by observing certain simple rules. Voluntary samples are perhaps a better method to use in the first stages of improvement work.

Surprise Contests.

Surprise contests, on the other hand, are a means of determining the average quality of the milk which each distributor is selling daily. Each dairy is generally scored on the average of several samples taken at random over a period of several months. The score is therefore representative of the daily output. Well-organized inspection departments usually give the dairyman reports of each sample soon after it is collected, and if it is unsatisfactory there is a chance for improvement before another is collected. For this reason an excellent opportunity is offered the inspector for doing educational work. This, coupled with the public recognition given dairymen who produce a superior product, has helped to obtain marked improvement in the quality of milk and cream in communities where surprise contests have been made a part of the regular inspection program.

Stock Keepers Without Silos Are Handicapped

Stock keepers without silos in many parts of our country are handicapped and sooner or later will be obliged to give way to the man who is producing with economy and profit. It is estimated that an average silo will save a stock farmer \$200 per year, and on this basis \$400,000,000 would be saved each year. At the same time the corn growers would be securing as much more by getting a good price for the corn they market.

Such a proper use of the silo would not cause an oversupply of stock or stock products, but it would produce them at a great saving which would be enjoyed by both the producer and consumer. Economy helps all, while waste and extravagance damage all.

The stock farmers of this country, except those who are depending solely on the open range, should understand that the silo for many years has proven an economic means of producing stock and stock products. The ignoring of this fact, and practice in the corn belt of the old-fashioned methods of feeding, are largely the cause of the present distress among the farmers of the corn belt.

A proper use of the silo would go a long way toward settling the present agricultural problem, and it is certainly worthy of our careful consideration.

Sudan Grass Forage Is Recommended for Swine

Sudan grass and sorghum are very similar, and while the Missouri station does not have any experimental data available showing the value of Sudan grass it is believed that they will vary little from those obtained with sorghum. The general recommendations for feeding hogs on Sudan grass would be the same as those given for feeding on sorghum. Sudan grass may be pastured with little or no risk.

The Kansas station makes the following report regarding Sudan grass: "Sudan grass is the best annual forage crop for hogs in the warmer sections of the country, and it compares favorably with alfalfa as a mid-summer hog pasture because it is very hardy and stands the hot, dry summer very well. Results secured at the Kansas experimental station showed that Sudan grass compared very favorably with alfalfa as a pasture crop for fattening hogs and for brood sows."

Chicks Need Sunlight

Chicks, as well as older fowls, need sunlight. In some way it helps the little fellows to make better use of the lime in their feed, and so aids in preventing leg weakness. This is due largely to the ultra violet rays in sunlight, and these do not seem to pass through ordinary window glass. The apparently go through "glass cloth" all right, and of course direct sunlight can be used on warm days.

ABOUT SLEEP

There is no such thing as "sleeping like a top" for eight solid hours—the period of slumber generally supposed to be necessary to the average human—if we may believe Prof. H. M. Johnson, of the Mellon Institute, Pittsburgh, who has been making experiments with sleeping persons whose rest was recorded by apparatus attached to a hanging bed on which they slumbered. But if the sleeper upon awakening in the morning is convinced that he has had eight hours of continuous sleep he has had it, for all practical purposes, and that's all there is about it.—Philadelphia Record.

Ancient—but Up to Date

An ancient hostelry near Shaftesbury, England, is named "The Listen Inn."

Turnpike Road

"Turnpike" in this connection is only another name for tollgate or tollbar. A turnpike road was originally a toll road, a road which had turnpikes or tollgates to collect tolls from persons passing over the road. The term is now applied to roads which formerly collected tolls.—Exchange.

Red Wheel Makes Canning Easy

WITH the Lorain Oven Method of Canning you do not have to stand over a hot stove and stir and watch. You never have to worry about the "boiling point" or the "steam pressure". Fruits are canned right in the jars. There is no expensive canning equipment to buy.

The Lorain Oven Heat Regulator measures the heat and automatically regulates the gas flame.

LORAIN OVEN HEAT REGULATOR

The Direct Action Gas Range with Lorain (Red Wheel) Regulator eliminates baking-failures and enables women to cook Whole Meals in the self-regulating oven while miles away.

Can your fruits by the easy Lorain Oven Method—and do all your baking by Time and Temperature in the Lorain-equipped oven of the

DIRECT ACTION Gas Range

The Direct Action Gas Range is different. There is no bottom in the oven. This open construction makes it an economical, successful baker—saves time and fuel.

The Direct Action broiler is above the baking-oven to save stooping. The separate broiler-burner makes it possible to broil steak or chops in a sizzling-hot broiler while the jars of fruit are in the oven at low temperature.

Noted War Horses.

Ohio generals in the Civil war rode horses which became, some of them, as famous almost as their noted riders. There was "Rhienzi," coal black stallion that Sheridan rode to Winchester, preserved in T. Buchanan Read's poem of the Civil war.

Custer, mounted, was a strik-ing figure. He was hard to please in mounts and in his ser-vice used six horses, his favor-ites being "Dandy," and "Don Juan." The latter was captured in North Carolina and was the horse that ran away with the general at the grand review in Washington. "Dandy" was kill-ed with Custer and all his com-mand, by the Sioux in 1876.

Grant had two noted horses "Lexington," and "Cincinnati." Like Sherman, Grant was not a showy rider. Sherman usually rode with his head bent forward as in thought. Sherman had a well proportioned bay, also called "Lexington," which he rode on his principal campaigns. This horse is faithfully portrayed in the equestrian statue of Sherman that stands in the Sherman plaza adjoining the White House.

McPherson had a coal black horse of mettle which was wounded when his owner was killed, but recovered and was sent to Clyde after the war.

General Steedman had a noted horse called Zollicoffer, because he had been captured from that general. He was killed beneath General Steedman at Chica-mauga at the time when the gen-eral was proving himself one of the heroes of that battle.

A noted war horse was "Old Baldy" ridden by General Pleas-anton at Gettysburg, Antietam and Chancellorsville. One of the noted horses of the Civil war was "Baldy" that carried Gen-eral Meade through Gettysburg. He was shot many times, but survived his master 10 years. He appeared riderless in the grand review at Washington.—J. H. Galbraith in Columbus Dispatch.

Woman on 17th Annual Hike Across Bridge

New York.—The Manhattan bridge has at least one true friend and admirer—Mrs. Joseph Woolston, Union City, N. J.

"I have done it again," said Mrs. Woolston. "You know I was the first woman to walk across the Manhattan bridge, and since then I have walked across it, rain or shine, every year on the anniversary of the opening of the footpath."

Mrs. Woolston was asked the reason for her attachment to the structure. Had she lived formerly in the neigh-borhood of the span?

"No," she said. "I used to live in this city, but that was years before the bridge was opened. But the day they opened it I came to New York alone to be at the ceremonies. When the bluecoats took down the bars I started across."

"When I got to the middle of the bridge a big, fine policeman said to me: 'Madame, you are the first woman to walk across Manhattan bridge. If I were you I would celebrate that by coming here every year on July 18 and walking across it.'"

"Since then," continued Mrs. Wool-son. "I have not missed a year. I used to walk over and get a drink of water at the little fountain on Nas-sau street, at the Brooklyn end, but I could not get that drink today be-cause the fountain is gone."

Blade in Man's Skull 28 Years Is Removed

Birmingham, Ala.—A piece of knife blade two inches long was removed by surgeons at Opelika, Ala., from the head of R. P. Waller of Auburn, after having been in Waller's head for the last 28 years. The operation is con-sidered a remarkable one.

Waller said that when he was about ten years of age he was stabbed with a knife in the hands of a drunken man. At the time Waller was stabbed it was said by doctors that only an open wound was left. This quickly healed.

For many years Waller suffered with severe headaches, and did not know the cause. Recently an X-ray examination was made of Waller's head and the piece of broken knife-blade was discovered. The operation was a success, and Waller says his headaches have disappeared and that he feels better than for years.

Choo-Choo's Warning

It is better to stop, look and listen. The car behind won't knock you as far as the locomotive will.—Duluth Herald.

THE AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

DELAWARE WINS IN MEMBERSHIP WORK

Delaware department, by its sturdy membership work and an unpreced-ent increase, topped the honor roll of all Legion departments when the books were closed at national head-quarters at Indianapolis in June for determining honor position in the con-vention parade, housing arrangements and seating arrangements in the con-vention hall at Philadelphia.

First state in the Union to ratify the Constitution of the United States on its adoption in 1787, Delaware re-solved to be the first in the great ses-quicentennial parade of the Legion to commemorate the one hundred and fiftieth anniversary of the adoption of the Declaration of Independence.

To win this honor, Delaware rolled up a percentage of 208.33 for 1926, as figured against the average member-ship of the department for the four preceding years.

Not far behind Delaware came Flor-ida, with 161.21 per cent. Idaho, win-ner of the Lindsay trophy, was third with 150.70 per cent.

The next ten of the forty-nine de-partments in order of rank were: France, 147.44; Wyoming, 139.01; West Virginia, 132.13; Arizona, 129.03; Colorado, 125.65; Canada, 120.83; Philippine Islands, 120.50; Alabama, 113.22; Georgia, 111.52, and Panama, 110.57.

An unusual feature of this year's race among the departments was the fact that 23 of them had at that date surpassed their average membership for the preceding four years as against only four departments to do so in 1925. Five departments had a higher percentage this year than en-abled Florida last year to win first place.

One week after the closing of the books the Legion, as a national entity, had surpassed its total membership as of December 31 of the preceding year. This result, the first time it has ever been attained since the Legion was founded, was accredited to a national membership campaign launched by National Commander John R. McQuigg immediately following his elec-tion at Omaha in 1925. He then called upon department commanders to "go back to your departments and make 1926 the greatest membership year the Legion has ever known."

Paris Limits Number of Legionnaires to 30,000

The National France convention committee of the American Legion an-nounces that the French government has limited the number of American Legionnaires who can be cared for in Paris during the Legion convention in September, 1927, to 30,000, that total being as many as the housing ac-commodations will permit. There are no large hotels in Paris, as Americans know them in the large cities of the United States. No other conventions will be permitted in the French cap-ital during the proposed Legion con-vention week, September 19-23, 1927.

Because of this limitation, an al-lotment of space on the 24 ocean lin-ers that will carry the Legionnaires to France has been determined, based on Legion membership in each state. The booking of berths, beginning No-vember 15, 1926, will be done in each state by the department France con-vention officer until March 1, 1927, when those unfilled will be returned to John J. Wicker, Jr., national travel director of the committee, who will then fill them direct from his office from states whose allotments were not sufficient to care for the demand.

700 Candidates Are Initiated at One Time

More than 700 candidates were in-ducted into the American Legion at a recent monster outdoor initiation ceremony conducted on the athletic field of the General Electric company at Lynn, Mass., by Lynn Post No. 6. Fifty thousand persons watched the scene while giant searchlights played upon the field. Amplifiers made it possible to hear every word.

Preceding the initiation, 35 Legion posts and battalions of the National Guard and the naval reserves held a parade. A banquet attended by 475 persons was held earlier in the eve-ning. Addresses were made by Na-tional Commander John R. McQuigg, Department Commander Francis J. Goode, Lieut. Gov. Frank G. Allen of Massachusetts; William J. Young, president of the Lynn Chamber of Commerce; Mayor R. S. Bauer of Lynn, and Post Commander Henry O. Slisbee II.

Legionnaires Assisted

When the Eucharistic congress was held at Chicago recently, 300 Amer-ican Legionnaires assisted in mar-shalling the crowds at the call of Senior Vice Commander Ferre C. Wat-kins, of the Illinois department. They helped to conduct 62,000 children through down-town Chicago streets on one day. They restored several hun-dred lost children to their parents. Chicago Medical post acted as em-ergency units during the congress.

EAGLES

Defeat Chillicothe Paper Co. In a Well Contested Game of Ball.

The F. O. E. team defeated the Chillicothe Paper Co. at the Yellowbud Fair Ground yester-day by a score of 2 to 1. It was a great game for the Circleville hooters present.

Rector, a new pitcher, was rather wild, passing seven men to first base, but was very effective the Chillicothe team gathering only one hit off his delivery in nine innings, they secured this in the first inning and then went hitless the rest of the game.

Fred Bruck, ex-Columbus As-sociation and present Central Ohio leaguer, pitched a clever game for the Paper Co. team but the home boys got to him for four hits and two runs, in the first inning but he held them safe for the other 8 innings, but two runs were plenty with the brand of pitching that Rector delivered and the spectacular support his team gave him.

LIGHTNING BURNS OFF HIS WHISKERS

Farmer Struck While on Plow Has Narrow Escape.

Alliance, Neb.—Struck on the head by lightning, Joe W. Kennedy, forty-five, farmer, still lives to tell the tale and the attending physician says he will recover. Kennedy was riding a gang plow pulled by four horses. He saw the storm approaching, but not regarding it as particularly threatening, he kept on with his work. He says he saw no flash and heard no thunder, but the next thing he knew was when he found a doctor bending over him in the hospital here.

The lightning struck Kennedy above the right ear, burned the crown of his hat, scorched the hair from his head and plowed its way across his cheek, jumping from there to his chest, which was seared, and onto his legs, where deep burns were left. From there it entered the iron seat of the plow on which he was riding, melting the metal into a mass and then passed along the steel cable to which his lead team of horses was attached to the plow. One of the four was instantly killed.

Kennedy was knocked unconscious and was found a half hour later by his wife and daughter. The lightning put out of commission most of the tele-phones in the neighborhood.

The course of the lightning could be clearly traced from where it struck Kennedy to where it leaped from his body. A full set of whiskers that adorned his face went up in smoke. The accident occurred on the man's farm five miles from town.

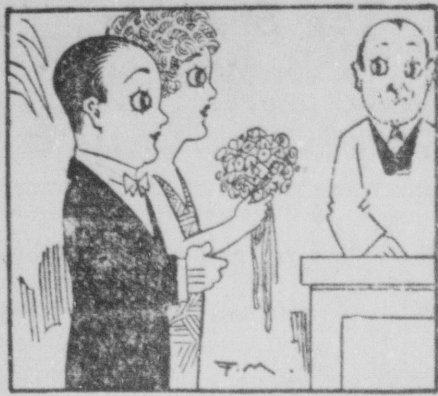

Lacked the Thrills

"I thought you gave up motoring for aviation."
"I did, but it was too tame. There isn't any fun going 120 miles an hour when you know there's no speed up to chase you, or pedestrian to box! over, or express train to beat."

The Pink of Condition

"Norah," said the mistress to the new maid, who had recently landed from the other side, "do you feel like feeding the goldfish?"
"No, ma'am," replied the maid. "I feel quite well, thank you."—Amer-ican Legion Weekly.

The Sleeping Beauty

By MARTHA McC. WILLIAMS

(Copyright.)

"IF YE had yer ruthers—now what would it be?" Squire Anders asked, sitting forward toward Cynthia like an iron-filing drawn by a magnet. "Remember, I'm askin' ye with a meanin'," he went on, hitching a trifle nearer—so near that Cynthia got up hurriedly and said, looking over his head: "I wish you'd stay away—for good and always."

He headed her off, caught her arm and said masterfully: "Oh, no! You jest think so. Why, I'm all that stands 'twixt you and real hard work—and you ain't built fer that—couldn't stand it six months."

"I can try it—and I will," Cynthia said steadily. "Understand—I don't mean to be rude. I know how foolish it is to throw away the chance to be rich and lazy all the rest of my life. But I know better the price is—beyond me. I couldn't be your wife—not for all the money minted—I wouldn't—not to save my life—nor yours. Now—will you let me alone?"

"No, sir-ee, Bob! That I won't!" Anders hissed. "I'll have ye, whether or no."

"We differ," Cynthia said icily. Then over her shoulder, wrenching free her arm: "I am leaving at ten o'clock—the rent is paid till midnight. Better send in a caretaker then."

"Goin'! How? Where? You—you shan't!" Anders began to sputter. She did not so much as look at him, but shot through the door and ran down the hall to the rear. Momentarily he was murder-mad. A huge fellow, coarsely vital, all the uncommitted sins of his forty years rioted through his rage, turning it partly against himself. Married ere he was fully bearded, he had lived a pattern life, as citizen, neighbor, farmer, ruling elder, just in everything, a husband beyond praise; this madness was a knife in the heart of his pride.

His wife had died suddenly—by help of a new car. He had been utterly faithful to her all these years—yet her passing brought him no grief—rather a sudden wild joy of enlargement. If she had given him children—instead, he was all alone.

All alone now that the spinster-cousin, who had been Anders' tenant, had died, Cynthia was in hard case. Cousin Jope had had a sufficient annuity. As she was but forty-five, her going was a shock.

Thanks to Cousin Jane, she was fairly educated. The education, plus her clothes and fifty dollars, summed her resources. Idle now to hope for work there in Clay county—Anders would block anything she might attempt.

From ambush of briar tangle she saw Anders after an hour stride off toward his big house, a mile away, but in clear view of the cottage. His field glass, she well knew, would keep her under surveillance, once he was home. She darted within, huddled together scant essential belongings, made a light pack of them, and ran down the path to the highway upon the farther side. But she did not follow the road—instead, struck recklessly across fields and along lanes. She thought she knew the direction of the convent.

The sisters would surely not grudge her the fruit she craved and so sorely needed. Presently she was under the bending trees, looking at them and choosing delicately of their ripest for all her hunger. Ten minutes later in sun-flecked shade she lay sound asleep. Thus it happened that between sundown and dew-fall two people came upon her—a woman with the face of an angel, and a matching soul. A cripple, she leaned heavily upon a man's arm—a young man. He cried hushedly at the sight of Cynthia: "Oh, see! The sleeping beauty! What a shame I'm not the fairy prince come to wake her."

"Careful, Pen—she may not be sleeping," the lady cautioned; "but I hope she is. Did you ever before see so perfect a picture of weary grace?"

"Never," was the answer—the young fellow running on: "Oh, for light enough for a snap-shot—or a spell to hold her while we might make sketches."

"No, fair little brother. You're joking. I know—couldn't sin so against hospitality—even if it is involuntary."

"Of course not! But—I wonder why she is here."

"We will know soon," the lady said. "Help me down beside her, then get out of sight—we must not frighten her."

Getting down was not easy—she was very lame. Somehow her motion awoke Cynthia, who made to spring up, but was stayed by a gentle hand, a gentler voice, saying: "Don't be frightened. You are with friends, if it does happen you never saw us before."

"I—need—them," Cynthia choked, then fell to sobbing hard, dry sobs, more pitiful than tears.

A year later the art world had lost its heart, and almost its mind, over "The Sleeping Beauty," prize picture of the spring exhibition. Probably the painter's romance, hinted rather than exploited, helped a bit. His name was Pennington Barris; his habitat, the Tennessee bluegrass. He lived there after the old fashion upon ancestral acres in company with his sister, Madame Everleigh, almost as fine a painter as he. But the central figure was Cynthia, his wife, whom even the eclipsed found infinitely charming. No model, of course—if the picture did somehow suggest her. All her husband would admit was that she inspired it.

THE JACKSON GIRLS' CLUB IN SESSION

The Jackson Township Clothing club met at the home of Annabelle Barch, August 16, at 1:30 p. m.

There were fifteen answered the roll call, by naming "one way to better the club." After the business meeting, Bertha Carle and Annabelle Barch, gave a demonstration on how to "cut a shape facing." This demonstration was given at Circleville on August 18. After the meeting games were played. Ice cream and cake were served and also ice lemonade.

Our next meeting will be at the Jackson township school building, September 1, at 1:30 p. m.

The first year girls must have their kimono dresses finished and the second year girls must have the princess slip finished and handed in to the leader September 1, at the school building. Katie K. Kendall, Reporter.

Ancient Indian Legend

The following legend is told of a fort about 25 miles from New Orleans named "Chef Menteur." The Choctaws were conspicuous for their love of truth, but one of the chiefs was known to prevaricate frequently. He was exiled and settled on a peninsula projecting into Lake Pontchartrain, which therefore was called "Chef Menteur," which is French for "Lying Chief." The fort was named for this place.

Men and women wanted for night shift August 24, to work from 6:30 p. m., to 5:30 a. m. Apply at the factory office or call 22. Sears & Nichols Canning Co. 24augd2.

HARTMAN THEATER.
x x x x x x x x

Columbus' favorite amusement institution, one which was started there and which numbers many Columbus singers in its cast, Al G. Field minstrels, will open the regular winter theatrical season at the Hartman theater, Columbus, the week of August 30, State fair week.

The cast is headed by Jack Richards and Billy Church, the golden-voiced tenors of minstrelsy, who have achieved fame all over the country. Church has a solo number, "Blue Bonnet," which is a delight, and Richards has two numbers, "At Peace With the World," the famous Berlin number, and "Moonlight and Roses" and he sings "Maggie," that famous old ballad, if the audience requests it. Then they have a harmony feast in which they sing many of the popular numbers together, and this act always stops the show.

Others in the cast are Harry Frankel, Jack Kennedy, Johnny Healy and Bob Conn, comedians, and Harley Newland, Dolf Kaster, Lloyd Gilbert, Garner Newton and Phil Pavey, singers. Bob Conn is newcomer to the Field banner and his eccentric dancing will be a treat for it is different from anything seen here. Gallagher and Cox is a new team of Charleston dancers and with the Doran brothers the dancing is right up to par.

A football burlesque is one of the big comedy scenes in the production; also "At the North Pole," an arctic absurdity, which shows the real North pole surrounded by zeppelins, planes and airships. There is a minstrel parade on the stage that is most unusual and it is followed by a scene on a roof garden.

"Blackface Eddie Ross and his African Harp" has been added to the cast as the premier comedian. He heads the list of fun makers and everyone who has ever heard him spin a yarn or play his banjo will know what a treat is in store.

Matinees will be on Wednesday, Thursday and Saturday. Mail orders may be sent now. Seats go on sale Thursday, August 26.

Silk Hose regular 69c values, Thursday at Friedman's

A BIG MISTAKE

It has been reported that the Circleville Welding Co., has gone out of business. There is nothing to it.

On account of there not being enough work to keep me busy I have accepted a position as welder with the Mid-West Box Co., where work during the day. I do my welding at the shop of evenings. Bring me your next job and have it done right.

Life's Obligations

Such help as we can give to each other in this world is a debt to each other; and the man who perceives a superiority or a capacity in a subordinate, and neither confesses nor assists it, is not merely the withholder of kindness but the committer of injury. —Ruskin.
